Projects

CivicTrack – Smart Civic Complaint Management System

- Developed a full-stack civic complaint management system using Spring Boot, React, and MySQL.
- Implemented REST APIs for complaints, users, departments, and notifications.
- Added JWT authentication and role-based access control using Spring Security.
- Integrated AI features for complaint categorization, priority prediction, and spam detection.
- Built responsive dashboards for citizens and administrators.

Health Insurance Cost Prediction

- Developed a machine learning model to predict health insurance costs using demographic and lifestyle features.
- Performed data preprocessing, feature encoding, and exploratory data analysis to prepare the dataset.
- Applied regression algorithms to train and evaluate the prediction model.
- Evaluated model performance using appropriate regression metrics and analyzed prediction accuracy.

Certifications & Achievements
